Contents of Volume 17

Number 1, September 1, 1964

R. S. Hanson, J. Blicharska, and J. Szulmajster. Relationship between the Tricarboxylic Acid Cycle Enzymes and Sporulation of *Bacillus subtilis* 1

Raymond Reiser and P. K. Raju. The Inhibition of Saturated Fatty Acid Dehydrogenation by Dietary Fat Containing Sterculic and Malvalic Acids 8

Robert L. Ory and Aaron M. Altschul. Cyclopropenyl Compounds as Sulfhydryl Reagents 12

Herbert Weissbach, Betty Redfield, and Herbert Dickerman. Cobamide-Dependent Synthesis of Methionine: Light Reactivation of an Inhibited Enzyme 17

Gene R. Williams and G. David Novelli. Stimulation of an *in Vitro* Amino Acid Incorporating System by Illumination of Dark-Grown Plants 23

V. I. Agol and G. A. Shirman. Interaction of Guanidine-Sensitive and Guanidine-Dependent Variants of Poliovirus in Mixedly Infected Cells 28

C. Ricci and V. Pallini. Occurrence of Free Nicotinic Acid in the Liver of Nicotinamide-Injected Rats 34

W. Urbach and W. Simonis. Inhibitor Studies on the Photophosphorylation *in Vivo* by Unicellular Algae *(Ankistrodesmus)* with Antimycin A, HOQNO, Salicylaldoxime, and DCMU 39

Walter Sauerbier. Host Cell Reactivation of Gamma-Rayed T1 46

Taro Hayakawa, Hiroo Muta, Masahiro Hirashima, Satoshi Ide, Keiichiro Okabe, and Masahiko Koike. Isolation and Properties of Pyruvate and α-Ketoglutarate Dehydrogenation Complexes from Pig Heart Muscle 51

S. Harbon, G. Herman, B. Rossignol, P. Jollès, and H. Clauser. The Linkage between Sugars and Amino Acids in Ovine Submaxillary Gland Mucoprotein "OSM" 57

David Epel. A Primary Metabolic Change of Fertilization: Interconversion of Pyridine Nucleotides ... 62

David Epel. Simultaneous Measurement of TPNH Formation and Respiration Following Fertilization of the Sea Urchin Egg 69

R. S. Criddle and Linn Park. Isolation and Properties of a Structural Protein from Chloroplasts .. 74

Anne P. Autor and William S. Lynn. Insulin Activity in Isolated Fat Cells Which Are Completely Permeable to Glucose 80

A. Ullmann, P. R. Vagelos, and J. Monod. The Effect of 5′-Adenylic Acid upon the Association between Bromthymol Blue and Muscle Phosphorylase b 86

Frank B. Howard, Joe Frazier, Marie N. Lipsett, and H. Todd Miles. Infrared Demonstration of Two- and Three-Strand Helix Formation between Poly C and Guanosine Mononucleotides and Oligonucleotides 93

Number 2, September 22, 1964

Mahmoud E. Ahmed, L. M. Black, E. G. Perkins, B. L. Walker, and F. A. Kummerow. Lipid in Potato Yellow Dwarf Virus 103

A. W. Norman, L. L. Bieber, O. Lindberg, and P. D. Boyer. Response of an Unidentified Phosphate Fraction and of Bound Phosphohistidine in Mitochondria to Ca^{++}, Uncouplers, and Inhibitors .. 108

J. G. Bieri and E. L. Andrews. Fatty Acids in Rat Testes as Affected by Vitamin E 115

D. M. Blond and R. Whittam. Effects of Na and K on Oxidative Phosphorylation in Relation to Respiratory Control by a Cell-Membrane ATPase 120

Lewis M. Siegel, Ellen M. Click, and Kenneth J. Monty. Evidence for a Two-Step Electron Flow from TPNH to Sulfite and Hydroxylamine in Extracts of *Salmonella typhimurium* 125

H. W. Heldt, H. Jacobs, and M. Klingenberg. Evidence for the Participation of Endogenous Guanosine Triphosphate in Substrate Level Phosphate Transfer in Intact Mitochondria 130

Carl Monder and Barbara Jacobson. Metal Ion Activators of Glutamine Synthetase 136

Raymond F. Chen. Photoinactivation of L-Glutamate Dehydrogenase in a Spectrophotofluorimeter .. 141

K. E. Pfitzner and J. G. Moffatt. An Improved Synthesis of P^{32}-2-Cyanoethyl Phosphate 146

Margarita Salas, E. Viñuela, J. Salas, and A. Sols. Muscle Fructose-1,6-Diphosphatase 150

D. O. Brummond and A. P. Gibbons. The Enzymatic Synthesis of Cellulose by the Higher Plant *Lupinus albus* 156

Robert Shapiro and Charles N. Gordon. On the Structure of Neoguanosine 160

Sune Frederiksen and Hans Klenow. Differential Inhibition by 3′-deATP of Nuclear and Cytoplasmic RNA Fractions of Ehrlich Ascites Tumor Cells *in Vitro* 165

Clifford J. Pollard. The Specificity of Ribosomal Ribonucleic Acids of Plants 171

A. R. Brenneman and Seymour Kaufman. The Role of Tetrahydropteridines in the Enzymatic Conversion of Tyrosine to 3,4-Dihydroxyphenylalanine 177

ROBERT E. BEYER. Formation and Isolation of a High Energy Phosphorylated Form of Coupling Factor II 184
DAVID L. FILMER AND D. E. KOSHLAND, JR. Role of Tyrosine Residues in Chymotrypsin Action 189
HERBERT S. ROSENKRANZ, HOWARD S. CARR, AND HARRY M. ROSE. Phenethyl Alcohol and Messenger RNA 196
Erratum 199

Number 3, October 14, 1964

LEWIS M. SIEGEL AND KENNETH J. MONTY. Kinetic Properties of the TPNH-Specific Sulfite and Hydroxylamine Reductase of *Salmonella typhimurium* 201
HANS KLENOW AND SUNE FREDERIKSEN. Differential Inhibition of RNA Synthesis by Actinomycin 206
AKE AKESON. On the Zinc Content of Horse Liver Alcohol Dehydrogenase 211
H. C. NEU AND L. A. HEPPEL. On the Surface Localization of Enzymes in *Escherichia coli* 215
HERRICK BALTSCHEFFSKY AND MARGARETA BALTSCHEFFSKY. Inhibition of Mitochondrial Contraction by a Soluble Muscular Relaxing Factor-Preparation 220
PHILIP PERSON AND HERBERT ZIPPER. Disruption of Mitochondria and Solubilization of Cytochrome Oxidase by a Synthetic Zeolite 225
TSOO E. KING AND MORIO KUBOYAMA. Enzymic Activity of a Cytochrome *a* Preparation Free of Cytochrome a_3 from Cardiac Muscle 231
JOAN C. SUIT, THOMAS S. MATNEY, C. O. DOUDNEY, AND DANIEL BILLEN. Transfer of the *Escherichia coli* K12 Chromosome in the Absence of DNA Synthesis 237

Information for Contributors

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

In order to assure rapid and accurate publication, it is essential that manuscripts be prepared according to the instructions given below. Manuscripts which do not conform to these specifications may have to be returned for retyping.

Preparation of Manuscripts

Article length should not exceed 1200 words (i.e., the complete manuscript, including space occupied by figures and tables, should be approximately 4–6 pages long).

Typing. Since articles are reproduced directly from manuscripts, the latter must be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used, and special care should be taken to insure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures, smudges, etc., must not appear. Care must also be taken to avoid errors in spelling, word division, and punctuation.

Manuscripts should be double-spaced, on only one side of the sheet; references, footnotes, and figure legends should be single-spaced. Typing area of the page must be as close as possible to 6″ wide by 9½″ long.

Illustrations and Other Nontypewritten Material. Photographs are acceptable. Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

All drawings should be done in black ink on white paper or tracing cloth; they must be planned for reduction to a width of not more than 5″. Final size of the printed page is 5½″ by 8⅜″; figures must be planned to fit these proportions.

Graph paper, if used, should be ruled in blue; grid lines that are to show in the final reproduction should be inked in black.

Tables and footnotes can be typed on separate sheets or where appropriate in the text, i.e., tables should appear on the relevant text page; footnotes (single-spaced) should be typed at the foot of the page on which they are mentioned in the text.

Page Numbers and Headings. Page numbers should be written lightly in blue (not typed) at the bottom of each page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should cited in the text by the name(s) of the author(s) with the year of publication in parentheses. The alphabetized, single-spaced list of references should be placed at the end of the manuscript. Abbreviations of journal titles should be those used in *Chemical Abstracts.*

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Reprints

Reprint order forms with price lists are sent to authors immediately upon acceptance of their manuscripts. Reprints are available in quantities of 100 and multiples thereof.
